## Pizza Smallwares 2018 Catalog

[www.hdntek.com](http://www.hdntek.com)

# About HD&TEK

Founded in 1974, **Hyup Dong** started as a manufacturer of paper boxes for domestic and export uses.

In the late 1980s, when the restaurant business started to explode in Korea including pizza outlets, **Hyup Dong** heavily invested in the development of food service smallwares, especially pizza smallwares that were dependent on imports.

**Hyup Dong** has also aggressively invested in developing products that meet the requirements of customers.

The end result is that we are able to supply exceptional quality products to customers at competitive prices with the added benefit of a short turnaround time.

We renamed the company to **HD&TEK** Food Service in 2010.

**HD&TEK** is committed to excellence and customer satisfaction.

We believe that we provide exceptional products.

We always have and will stand behind our products until our clients are satisfied.

**We understand how to work together with  
And we know how to win together with**

**We are a real customer maniac!**

# Hot Bank Induction Heating Delivery System

## Hot Bank Induction Heating Delivery System

Our new HOT BANK induction heating pizza delivery system allows pizza stores to deliver hot pizzas rights to the customers' doorsteps. HOT BANK heats up the special heating element that is installed inside a special delivery pouch that retains the heat for a prolonged period of time. Now pizzas can be delivered at the ideal temperature of 75 to 80 degrees Celsius to the customers. And it is made of special metal alloy and plastic alloy and made to withstand up to 400 degrees Celsius, too. (Temperature control sensor built in).

### a Delivery Pouches

33001086 Fabric, Black

The Hot Bank pizza pouches are made using 3M™ Thinsulate™ Insulation thermal technology.

### b Induction Heater

32001000 220V

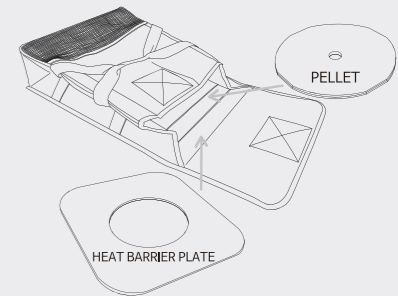

### c Heating Pellet

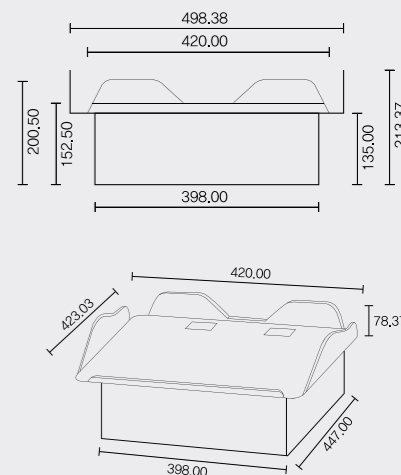

33003000 Heating Pellet

## Instruction

1. The delivery pouch with the special pellet installed is placed on the induction heater. (The red CHARGE lamp lights up indicating the delivery pouch is charging.)
  - ※ If three SENSOR lamps blink with an alarm sound, remove and reposition the delivery pouch.
2. After about two and half minutes, the green READY lamp will light up indicating that the delivery pouch is fully charged.
  - ※ After the first charge, recharges will take approximately 60 seconds or less, depending on the residual temperature in the pellet.
3. The delivery pouch is ready to use for delivery.
